

General Information

Chemical Formula	Na ₂ SO ₃	
Synonym	Sodium sulphite	
Origin	China	
H.S. Code	28301000	
CAS No.	7757-83-7	
Molecular Weight	126.037 g/mol	

Application

Food industry	Used as food preservative in meat and fresh produce to prevent discolouring.
Chemical industry	Used in water treatment, oil recovery, froth floatation of ores.
Others	Used in manufacture of TNT for military use.

Specification

Property	Units	Value
Appearance		White powder
Purity	%	99
Odour		Odorless
Melting point	C	Decomposes
Boiling point	C	Decomposes
Solubility		Soluble in water
Density	g/cm ³	2.633

Packaging

- 25 kgs in white plastic bag with a weaving bag outside
- 25KG/bag
